

April 1, 2025

Construction Notice

Please accept this update from New York Transco (NY Transco) regarding upcoming construction activities at the New York Transco-owned Dover Station property at 2238 Route 22 Dover, NY (Site). Please note this is subject to change.

Delivery of Phase Angle Regulator (transformer) – the third phase angle regulator (PAR), to be stored as a spare, is planned for delivery to the Site this week. Pending any delays, the spare PAR is anticipated to be delivered on Friday. This delivery will follow similar procedures to the prior two PARs that successfully occurred in 2024 and 2025 respectively.

The delivery is being closely coordinated with stakeholders, including the NYS Department of Transportation, Dutchess County and the NYS Police, among others.

Construction Progress – construction activities continue at the Site and energization remains on track for this summer.

Safety is our top priority! As such, please do not enter the construction site or approach construction crews/equipment. If you need to speak to a project representative, please reach out either via phone or email with questions or for more information. Please anticipate future communications on our progress or various activities at the Site.

We look forward to keeping you updated on progress and welcome your questions.

Thank you,

Shannon Baxevanis
Director of Communications & Public Affairs
New York Transco
